Lab Mid Term Exam

Spring-2026

CSC337 Advanced Web Technologies

Class: BSSE

Instructor: Yasmeen Jana

Marks: 25

Submission Date: 30/04/2026

Name: _____

Reg. No: _____

CLO NO	Course Learning Outcome	Blooms Taxonomy Learning Level
CLO 5	Design REST API based web server for web application.	Creating

Note: You must submit a PDF document that includes the link to your GitHub repository along with screenshots of the application's output.

Q1: Create a complete web application based on a topic of your choice by designing and implementing a RESTful API using Node.js, Express.js, and MongoDB. Apply key course concepts, utilize Express view generators (EJS) for dynamic page rendering, and integrate Bootstrap to build a responsive and user-friendly interface.

No.	Criteria	Description	Marks
1	API Design & Functionality	Clear RESTful endpoints for CRUD, correct HTTP methods, proper status codes & JSON responses	6
2	Database Integration	MongoDB connection, proper Mongoose schema with validations and relations	4
3	Express Generator & EJS	Application structured using Express generator, dynamic views with EJS, data rendered correctly	4
4	Bootstrap & UI Design	Responsive layout, Bootstrap components used (forms, tables, buttons), consistent styling	3

5	Code Quality & Organization	Proper folder structure, readable & commented code, use of middleware & error handling	3
6	Extra Features / Creativity	Additional features like search, filtering, authentication, overall creativity	3
7	Documentation & Submission	README with instructions to run, API endpoints documented	2
